

BARRINGTON HIGH SCHOOL

BEFORE

LOCATION: Barrington, IL

SPACE: 1,400 square ft.

SCOPE: Provide collaboration spaces, technology tables, white board walls, bold graphics and a brain bar.

THE PROBLEM: Barrington School District 220 needed to take a typical classroom and turn it in to a space that would have the “wow factor” for their new entrepreneurial incubator. They were in need of a build out that would develop and foster creativity in high school students while also accommodating current and future technology needs.

THE SOLUTION: By combining different types of collaboration spaces, technology tables, white board walls, bold graphics and a brain bar, an energized and inspired space was achieved for teenagers to meet, discuss, and collaborate.

TESTIMONIAL: “We went to ROI with an idea; create a state-of-the-art classroom that embraces group learning. ROI came back with a variety of cutting edge options and executed on the chosen option with precision, on-time, and on-budget. Now we have a world class room for education and a relationship to do it again.” – Karl Fruecht
