

### AXON CABLE

**LOCATION:** Schaumburg, IL

**SPACE:** 10,500 square ft

**SCOPE:** Provided both office and manufacturing interior design. Integrated space planning, wall coverings, decorative paint, materials and finishes package, and furniture solutions.

#### THE PROBLEM:

Fast growing client needed a tech office that was productive and cutting-edge. Corporate headquarters required branding throughout the space.

#### THE SOLUTION:

Inspired by our client's pyramid shaped logo, our design team chose subtle branding throughout the entire work space, to complement well placed logo signage. Additionally, all employees were equipped with adjustable height workstations, providing them the opportunity to stand throughout the day. Multiple conference areas make for multiuse rooms for training, meetings, and presentations. Efficient space planning used every square foot to make the most of this space for the client.
