

FUSE

LOCATION: Berkeley, IL

SPACE: 25,771 square ft.

SCOPE: Provide space planning, materials and finishes package, lighting & furniture solutions

THE PROBLEM: Fuse came to Vertical Interior Design in need of rebranding. They were merging three companies into one and needed to update their current, outdated office space to fit the new working needs.

THE SOLUTION: Our designers worked closely with the client and architects to create the best space plan for Fuse's buildings. We collaborated with the construction team to phase and manage the project, eliminating excessive downtime. Vertical Interior Design created a new, modern style and color scheme for Fuse and their new brand. We then incorporated that style and scheme into the redesigned workspace.

TESTIMONIAL: "The office transformation has given our employees a sense of pride and renewed energy. Our new space is more inviting to our clients as well." - John Reilly, Principal

FURNITURE COST PER SQ FT: \$16
