

S&S ACTIVEWEAR

LOCATION: Bolingbrook, IL

SPACE: 24,601 square ft.

SCOPE: Provide space programming & planning, materials and finishes package, furniture solutions & accessories.

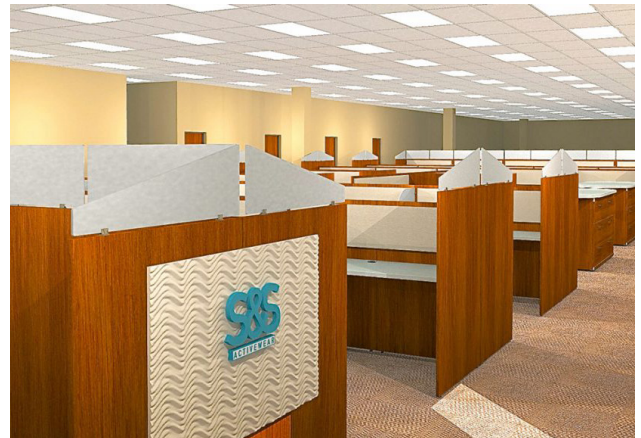

THE PROBLEM: S&S Activewear came to Vertical Interior Design because they were looking for a fresh, new look for the office space they were moving into. Moving from a layout that consisted of cubicles with high walls, to a bench layout with shorter walls, the company wanted to provide employees with an open space to foster more of a team environment.

THE SOLUTION: Through space programming and planning, our designers came up with a layout that worked for all of their company's departments. The designers worked closely with the architect to come up with a modern design that included finishes and materials for not only the flooring and furniture, but, also the open ceiling acoustical clouds and DIRT interior walls.

TESTIMONIAL: "Our new office configuration has changed the morale of our company! The VID team has been a delight to work with from design, build, install and usage. We now have a modern, state of the art office space to attract new employees and talent to work for our company." – Jim Shannon, CFO

FURNITURE COST PER SQ FT: \$26
